# PRIME SUITE

## Site Controllers

Simplifying Business Operation Workflows

The simplest way to boost  
revenues is to work efficiently

---

We provide solutions that help you access  
real-time, accurate fuel data access anywhere,  
anytime; enabling you to monitor, manage and  
report instantly and efficiently.

# Taking Your Business to the Next Level

Having to deal with the highest level of operational challenges and ensuring your fleet is back on the road as quickly as possible is not an easy task.

Our Wi-Fi enabled, PRIME site controllers, are based on Gasboy's long-standing expertise in the Fleet & Fuel industry and designed to meet the uppermost demands of the Commercial and Industrial (C&I) market.

Gasboy's outdoor PRIME suite is specifically suited to withstand harsh environments and extreme temperatures and provide highly efficient, comprehensive, and secured automation for any site architecture.

All site controllers utilize a variety of fuel authorization methods, providing operational flexibility, time savings, and business efficiency for both stationary and mobile fuel sites.

# A Full Suite of Superior Site Controllers

## Islander PRIME Pedestal Controller

The Islander PRIME is the best-in-class homebase controller with an all-in-one standalone pedestal, enabling forecourt automation and flexible fueling authorization options.

With a built-in OrPAY1000 outdoor terminal and the EMV option, the Islander PRIME becomes a secure standalone payment terminal. The EMV hybrid card reader allows retailers to securely manage payment transactions with both magnetic and chip cards.

Islander PRIME is typically installed on the fueling island and supports up to 8 mechanical / 48 electronic hoses with several communication protocol options.

## Site PRIME Stationary Site Controller

An optimal and modular solution for complete site control and management, the Site PRIME is a cost-effective standalone site controller housed in a modern sealed and ruggedized box for outdoor and indoor installations.

Site PRIME supports up to 2 mechanical hoses / 32 electronic hoses, offering flexible fueling authorization capabilities through the built-in OrPAY1000 terminal.

## Integrated PRIME Dispenser Built-In Controller

The built-in controller is the perfect choice for customers who wish to establish an automated homebase site. Our Atlas dispensers with the integrated PRIME controller and OrPAY1000 installed inside the pump, enables various authorization methods, including contactless cards & tags, and proprietary magnetic cards.

It also includes a built-in Wireless Gateway Terminal (WGT) when integrated with Gasboy's FuelPoint® PLUS fueling solution.

# Truck PRIME Tanker Truck Controller

Truck PRIME is a mobile fleet fueling controller, specifically designed for installation on fuel tanker trucks. Housed in a modern ruggedized box, it features cushioning shock absorbers that dampen vibrations in severe driving environments. The unit controls, monitors, and stores on the spot refueling data. The available options include OrPAY1000 for fueling authorization.
